Resolved	High	1	Region - Admin - Email Campaign	Rgn Email Campgn - State DDL	It seems that we may still have some issues with the Regional Email-Campaign. In working with the Email-Blast function today I discovered some add'l anomalies as I was trying to understand the Region 36 email problems. If the 'State' dropdown is messed with it causes unexpected results. In the 2 screenshots below...the only variable is whether the State was ALL or CA. #1 (State= All) has only 72 emails...but #2 (State=CA) has 586 emails. Again this doesn't seem to be logical as CA is a subset of ALL...but why would a 2/N/36 Email Campaign go out side of Region 36 Volunteers anyway? It would seem that if 2/N/36 is specified...then any 'State' dropdown specification would be ignored. Attached Email for reference	02/06/10		Rand
Resolved	High	1	Reports - Player Export	Player Export	We had our spring registration yesterday, and we've got some database problems. When I do a Player Export for Spring I get 471 records, but when I look at the Manage Programs screen for Spring, I get 461 players, and there are some on the Manage Programs screen that are not in the Player Export. One of the problem records is my own son William Shalla. He appears in the Manage Programs, but not the Player Export. Attached Email for reference	02/07/10	02/08/10	Kevin
